

Pasting Text with No Formatting

2007-09-29 22:59:27 by Southern

It is hard to count the number of times a day I have to paste something I've copied from the web, email or a document into Notepad so I can dump all the formatting that is copied via "CTRL-C", not anymore ...

PureText is a lightweight tray icon that strips the formatting from clipboard text. You simply use CTRL-C to copy as normal, but use "Windows Key" - V to paste JUST THE TEXT without formatting - ahhhhh... pure joy from the little things.
