

TitleTime v2.12

2010-01-27 16:03:22 by Southern

TitleTime adds the current date and/or time to the window-title of the currently active application window.

Additional options are a second clock (with a different time), week number, GMT/UTC time, "Swatch Internet" Time and Sounds at each full, half or quarter hour.

It is also possible to set five alarms, which will display user-defined pictures and/or execute resp. open programs, wave-files or documents.
