

Obama Seizing Control of the US Military

Potential Cataclysm Ahead

[Trevor Loudon](#)

Barack Obama has worked with pro-Moscow Marxists including Frank Marshall Davis and Alice Palmer, and pro-Cuban radicals like Bill Ayers and Bernardine Dohrn, his entire life.

Their number one priority has always been the destruction of the US military, the only significant block remaining, to global revolution.

Now that the Davis/Palmer/Ayers/Dohrn protege has the reins of power, President Obama is working hard to destroy US military superiority, consciously or unconsciously, to the advantage of the Russia/China/Cuba/North Korea/Iranian/Islamic alliance.

From William Bigelow at Breitbart.com:

In an attempt to seize total control over national security and bypass congress, a frightening new step by the Obama Administration is coming into play. As noted in Friday's Wall Street Journal in an op-ed by John Bolton and John Woo, a State Department advisory group that is run by former Secretary of Defense William Perry is advising that the U.S. and Russia both reduce nuclear weapons without a treaty, as a treaty would require ratification by Congress. This would allow Obama and his executive branch to unilaterally cut our nuclear weaponry and ignore the treaty clause of the Constitution.

As Bolton and Woo point out, the US has a greater global responsibility than Russia; Iran and North Korea, neither of which is far from Russian interests, can only be countered by U.S. military strength. In addition, they note that Russia is not a

trustworthy partner in weapons reduction; it has violated many arms-control agreements, such as the 1991 Presidential Nuclear Initiatives.

Some of the inherent problems in the seizure by this executive branch of decision-making power is Barack Obama's desire to deeply cut our nuclear forces. A joint decision with Russia would place long-term limits on our cache of arms, thus placing constraints on us catching up if Russia decides to go ahead and build and the blurring of the lines deliberately drawn by the Constitution's Framers separating the executive and legislative branches power.

Obama has made no secret of his desire to dismantle our nuclear capacity; the New Start Treaty he championed in 2011 forced the U.S. to observe a ceiling of 700 strategic delivery vehicles and 1,550 strategic warheads, and this past March he stated his desire to cut our arsenal further:

“ ... a step we have never taken before – reducing not only our strategic nuclear warheads but also tactical weapons and warheads in reserve.”

It is naïve to assume that Obama is simply blind to the results of his actions and trusts the world around him to act with generosity. There has been too much evidence of Russia's support of Iran's nuclear weapons program, and Russia has cunningly avoided supporting sanctions on North Korea for its rocket launches; in December, Georgy Toloraya, Director of Korean Research at the Institute of Economics, simply said:

“In Russia we believe that resolutions must be observed and UN decisions must be implemented. We think that North Korea has the right for space explorations but only after all the issues linked with the UN sanctions banning rocket launches with the use of ballistic technologies are settled. It is necessary to divide two aspects – we support the discussion of the rocket launch issue by the UN Security Council but we don't think that this must automatically mean tougher sanctions against Pyongyang.”

Obama knows all this. His step-by-step evisceration of the United States is not confined to its economic system but its national defense as well.

I go a little further. I say that Obama is happy to wreck the US economy, because this will enable him to completely destroy US military defensive capability. This is the REAL agenda of the left. The people Obama has worked with his entire life.

Four more years of Obama may well bring America to the point of no return.

If Obama is allowed to realize the Davis/Palmer/Ayers/Dohrn vision of a militarily impotent America, Americans will be faced with two very harsh choices.

Lay down your arms and give up your sovereignty to a United Nations world

superstate.

Or face the combined military might of Russia, China, Iran, North Korea, Cuba, Venezuela, Nicaragua, Vietnam, Cambodia, Laos, possibly Pakistan, Indonesia and Brazil, and several other countries... with hardly a friend in the world to come to your aid.

This won't be a one or two front conflict. This will be a multi-polar, all out attack on the US homeland.

Americans need to wake up. And fast.
