

PMC-RN Responsive plugin

2019-03-16 10:03:33 by papamike

RavenNuke Version 2.51 is FREE and is a very safe, secure and user friendly Content Management System (CMS) you can use to create and then manage your website. It's easy to install by following the "How To Install" instructions that come with the package. But up until now it wasn't compatible with multiple screen resolutions especially mobile devices.

Now it is and you can download and install those files that will make your copy of RavenNuke (Version 2.5) mobile ready. And it's a simple process. Download the package onto your desktop and unzip it then follow the instructions that are included in the .html file. For questions, comments and/or problems visit my forums at [Papa Mike's Creations](#).

The plugin contains: Completely responsive phpBB2 Forums, Downloads, Your Account, Web Links, News, other Modules, Blocks, Themes, and more all designed to make your RavenNuke site fully mobile ready and HTML5 compliant.

NOTE: "PMC-RN Responsive" plugin is an ongoing project that papamike is designing/working on and files will change in the future. Be sure to check back to keep up with those changes. As changes are made I will make notations in the forums. Become a member and you can join in on the discussion(s).
