

Content Slider for PMC-RN Responsive

2019-05-20 18:05:49 by papamike

Mike's JSSOR Slider was designed to run on PMC-RN Responsive plug-in without a whole lot of fuss. Simply unpack the .zip file, move your images into the 'img' folder and then open the file slider-config.php to enter the image names and text. It's really that simple. You can create 10 individual slides for content to display on your RavenNuke CMS driven website. Go [HERE](#) to see it in action and to also download a copy from the Add-ons.
